FOREWORD

This Amended Version of the Hassocks Neighbourhood Plan has been prepared by Hassocks Parish Council following the refusal of Mid Sussex District Council (MSDC), the Local Planning Authority, for those areas of Hassocks Parish outside the South Downs National Park to allow the original 2016 Neighbourhood Plan to proceed to Public Examination. The reason for this was that following the Government Inspectors instruction to MSDC to increase the supply of housing across Mid Sussex in February 2017, our Plan made insufficient provision for new homes in Hassocks Parish.

This decision presented the Parish Council with a choice. Either abandon the Neighbourhood Plan altogether, or prepare a new one which complied with the housing requirement of the new District Plan which was finally adopted by MSDC in March 2018.

The Parish Council concluded that, in spite of this set back, and the fact that we would need to at least double the amount of new housing to meet the District Plan figure for Hassocks, we should prepare a new Plan for the following reasons:-

- The District Plan is a legally binding document. Hassocks and all other town and parish councils in the District will have to comply with its housing requirements.
- Once adopted, a Neighbourhood Plan becomes a Development Plan Document which gives protection against further development.
- If we have no Neighbourhood Plan we will be more susceptible to pressure from unwanted development and have less ability to shape and control our future and protect our environment.
- If we have no Neighbourhood Plan we will benefit much less from the substantial infrastructure contributions arising from the Government's Community Infrastructure Levy when this is introduced in Mid Sussex.

In light of the above, this Plan, which has been prepared by the Parish Council and co-opted members of the community, sets out a vision for our Parish from 2014 (which is the technical start date we must use) until 2031 (which is the end date of the District Plan).

The aims of the Plan are to:

- Provide a framework for future development in the Parish;
- Protect and enhance existing open spaces;
- Harness development value to improve infrastructure; and
- Establish Hassocks as an exemplar of high quality design and sustainable development.

This Amended Plan takes full account of the higher housing requirement for Hassocks set out in the District Plan. In this regard you will notice that the Strategic Site for 500 new homes on the Land North of Clayton Mills, which caused such controversy, has been included in our Plan.

The reason for this is that it is a District Plan Strategic Allocation included in the District Plan on the instruction of the Government Inspector. As mentioned above, the District Plan is a legally binding document so this site must be accepted. The addition of this site means that, taken with the other sites which already have planning permission, such as Ham Fields and the Hassocks Golf Club, we can fully meet the District Plan Housing Requirement for Hassocks.

There is no need to allocate any more land for residential development in the Plan Period.

This Plan is now issued for public consultation. Please let us have your views.

Councillor Bill Hatton
Chairman, Neighbourhood Plan Working Group

Chapter 1

Introduction

1. INTRODUCTION

- 1.1. The Hassocks Neighbourhood Plan (HNP) has been prepared by Hassocks Parish Council (HPC). The HNP will guide and influence development in the Parish up to 2031. It covers the whole of the Parish, including Keymer and Clayton, as shown in Figure 1.

- 1.2. The southern and eastern boundary of the Parish lies in the South Downs National Park (SDNP). The extent of the SDNP is shown at Figure 2. South Downs National Park Authority is the Local Planning Authority for those areas of the Parish within the South Downs National Park.
- 1.3. Mid Sussex District Council (MSDC) designated the Parish for the purposes of neighbourhood planning on the 16 July 2012. Given part of the Parish lies within the SDNP, the South Downs National Park Authority (SDNPA) also designated the Parish in September 2012.

- 1.4. The preparation of the HNP commenced thereafter with the formation of the Neighbourhood Plan Working Group (NPWG).

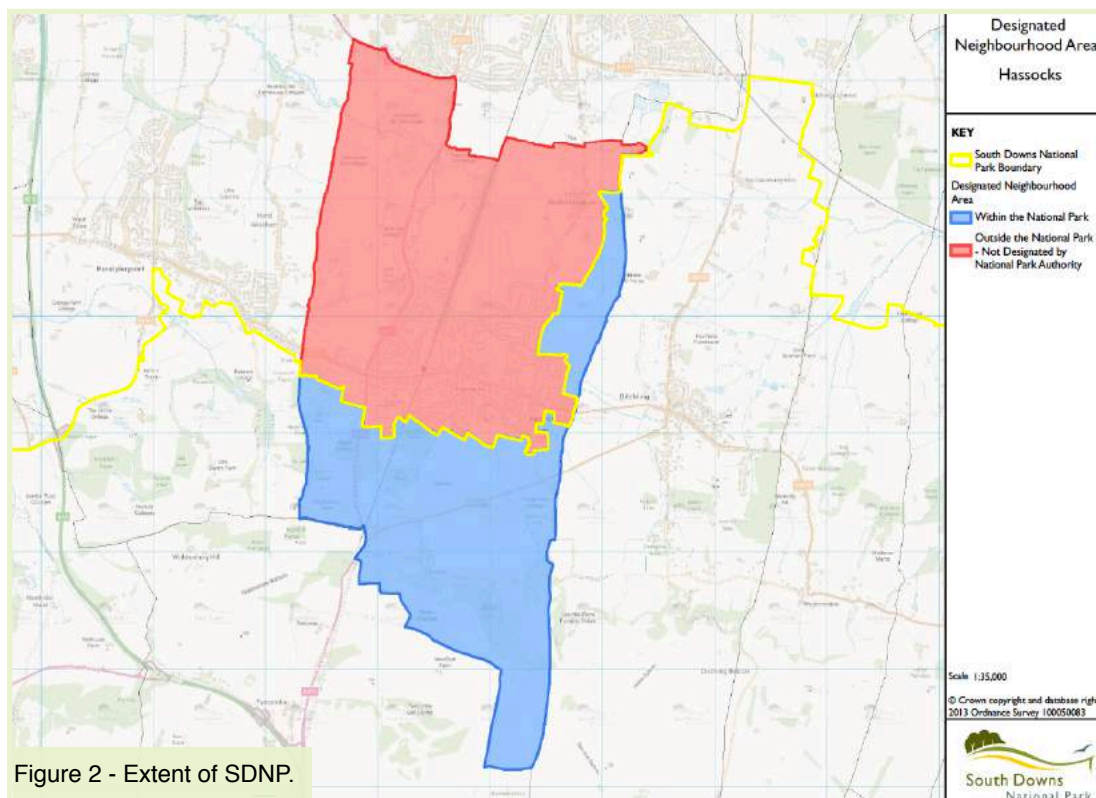

Figure 2 - Extent of SDNP.

- 1.5. The Regulation 14 Pre-submission HNP and accompanying SA were submitted to MSDC in June 2016. Regulation 16 consultation followed between July-September 2016. However, the Submission HNP was not progressed to Examination. In light of feedback from the ongoing examination of the Mid Sussex District Plan (MSDP), in particular with respect to the overall level of housing need, MSDC determined that the Submission HNP should not proceed to Examination. Progress of the HNP was paused, pending the final adoption of the MSDP, which occurred in March 2018.
- 1.6. Following this, and in light of a meeting with MSDC Officers, the NPWG met on the 27 June 2018 to discuss the HNP and future options. It was agreed the NPWG would progress a 'light touch' review of the HNP.¹
- 1.7. This Submission Plan has been prepared following extensive background work, publication and consultation on the Regulation 14 Pre-submission HNP.

¹ See minutes of NPWG meeting on 27 June 2018

Planning Context

- 1.8. The Localism Act 2011 introduced new rights and powers to allow local communities to shape new development by preparing neighbourhood plans. A neighbourhood plan establishes planning policies for the development and use of land, for example where new homes should be built and what they should look like. Neighbourhood plans allow local people to influence the type of development for their area while contributing to the wider needs of the area.
- 1.9. The Government published the revised National Planning Policy Framework (NPPF) in February 2019. This sets out the Government's planning policies for England and how these should be applied. It provides a framework within which locally-prepared plans for housing and other development can be produced.
- 1.10. With respect to neighbourhood planning, the NPPF advises:
- "Neighbourhood planning gives communities the power to develop a shared vision for their area. Neighbourhood plans can shape, direct and help to deliver sustainable development, by influencing local planning decisions as part of the statutory development plan. Neighbourhood plans should not promote less development than set out in the strategic policies for the area, or undermine those strategic policies."*²
- 1.11. Neighbourhood plans must be in general conformity with the adopted Development Plan Document.³ For those parts of the Parish which fall within Mid Sussex District planning boundary, the most recently adopted Development Plan is the MSDP 2014-2031.⁴ This was adopted by MSDC on the 28 March 2018.
- 1.12. For those parts of the Parish which fall within the SDNP, the adopted Development Plan is the Mid Sussex Local Plan 2003.
- 1.13. The SDNPA is preparing a Park-wide South Downs Local Plan (SDLP). The SDLP was submitted to Government in April 2017. The Examination of the SDLP is ongoing. The Inspector's Report is awaited. Once adopted, the SDLP will replace the existing planning policies operating across the SDNP.

² Paragraph 29 of the National Planning Policy Framework

³ Paragraph 37 of the National Planning Policy Framework

⁴ Small Scale Housing Allocations Document forms part of the Development Plan

Plan Preparation

- 1.14. This HNP reflects the culmination of work by the NPWG since the Parish was designated for neighbourhood plan making in July 2012. It builds upon the evidence gathering, stakeholder engagement and plan preparation that took place in formulating the initial version of the HNP that was the subject of statutory consultation in 2016.
- 1.15. Since HPC resolved to progress with a revised HNP in June 2018, the NPWG have undertaken a detailed review and update of the evidence base. Integral to this approach has been a review and update of the Vision and Strategic Objectives of the Submission HNP.
- 1.16. In addition, a review has been undertaken of the planning policies and aims. This has been informed by new and revised background papers on Housing; Policy 1: Local Gaps; Policy 2: Local Green Spaces.
- 1.17. Public consultation on the Regulation 14 Pre-Submission took place between January-February 2019. Following a review of representations received, the Submission HNP has been prepared. It has been prepared in accordance with the Neighbourhood Planning (General) Regulations 2012 and is in “general conformity” with the strategic policies of the MSDP.
- 1.18. In addition, a review has been undertaken of the planning policies and aims. This has been informed by new and revised background papers on: Housing; Policy 1: Local Gaps; and Policy 2: Local Green Spaces have also been updated.

Plan Structure

- 1.19. The HNP sets out:
- Chapter 2: Description of the Parish;
 - Chapter 3: HNP’s Vision and the Strategic Objectives for the area up to 2031;
 - Chapter 4: Environment and Heritage;
 - Chapter 5: Community Facilities;
 - Chapter 6: Housing;
 - Chapter 7: Economy; and
 - Chapter 8: Transport.

- 1.20. Stakeholder and residents have previously expressed support for improvements to community facilities and transport infrastructure.⁵ Where issues are outside the remit of the HNP these have been included as Aims to support the aspirations of the local community.

Consultation

- 1.21. This Submission HNP and the accompanying documents (Sustainability Appraisal including Non-Technical Summary, Basic Condition Statement and Consultation Statement) have been approved by HPC for submission to MSDC.
- 1.22. Following a period of public consultation, the Submission HNP will be subject to Examination. Subject to receipt of a positive Examiner's Report, the HNP will then proceed to Referendum and be "made" in due course by MSDC.

⁵ Public consultation events held during 2014-2015

Chapter 2

Parish Profile

2. PARISH PROFILE

2.1. Hassocks Parish is located south of Burgess Hill, east of Hurstpierpoint and west of Ditchling. To the south of the main built-up area of Hassocks and Keymer village is the SDNP, beyond which is the urban area of Brighton.

2.2. It is a Parish of high landscape and townscape quality. It includes the steep chalk scarp slopes of the South Downs that gives way to the low weald to the north. In total, the Parish extends to some 10.88kms² (4.20sq miles).

Figure 3 - Hassocks and Keymer

2.3. At its centre is the built-up area of Hassocks and Keymer, whilst to the south is the hamlet of Clayton. The main built-up area is separated from Hurstpierpoint in the west, Ditchling in the east, and Burgess Hill to the north by narrow, but important, rural hinterland 'gaps' of generally undeveloped land.

2.4. The main access routes through the Parish are the east-west B2116 and the north-south A273. The London to Brighton railway line also runs through the Parish north-south, with a station serving the local community.

Environment and Heritage

2.5. The countryside character of the Parish is dominated by the north-facing steep chalk scarp slopes of the South Downs. These are on the southern edge of the Parish, contained south of Underhill Lane. They include an important area of species rich chalk grassland, that is recognised by its designation as part of a Site of Special Scientific Interest (SSSI).

2.6. To the north of this is the scarp footslopes. These run from Underhill Lane, north to the southern edge of the built-up area of Hassocks and Keymer. The character area is defined by its undulating, low sandstone ridges and gentle clay vales. There are areas of ancient woodland, predominantly either side of the A273 and railway line to the south of the main built-up area (e.g. Butchers Wood).

- 2.7. The northern area of the Parish comprise part of the low weald. This is predominantly a lowland mixed arable and pastoral landscape with low ridges and clay vales.
- 2.8. The watercourses of the Parish typically drain north, and comprise part of the Upper Adur streams. This includes the Herring Stream which runs through the built-up area of Hassocks (see Figure 4). Parts of the periphery of the stream are defined as being at risk of flooding at a greater incidence than a 1 in 100 year event.
- 2.9. There is a Scheduled Ancient Monument within the Parish, comprising 4 bowl barrows, some 800m south of New Barn Farm. These are funerary monuments dating from the late Neolithic period to late Bronze Age.
- 2.10. Evidence of Roman habitation of the Parish has also been found. The area may have been a crossroads between routes running north-south and east-west, the latter along the low sandstone ridge.
- 2.11. There is also evidence of medieval occupation of the area, perhaps most notably, the Grade I Listed St John the Baptist Church at Clayton. This dates from the 11th Century and contains important frescoes.
- 2.12. There are 3 Grade II* Listed Buildings within the Parish, namely Ockley Manor, Clayton Windmills and the attached Millhouse, and Clayton Priory. There are a further 22 Grade II Listed Buildings.
- 2.13. The Parish has two Conservation Areas; the historic core of Keymer, focussed around Keymer Road, The Crescent and Lodge Lane; and the historic core of Clayton, focussed around Underhill Lane.

Figure 4 - Herring Stream

Community Infrastructure

- 2.14. The community facilities of the Parish are predominantly focussed within the built-up area of Hassocks and Keymer.
- 2.15. State education provision is contained with 3 schools; Hassocks Infants, The Windmills Junior and Downlands Community School (Secondary).

- 2.16. There is a health-centre in Windmill Avenue, and this is operated as part of a group of 3 health centres that also incorporates those in Hurstpierpoint and Ditchling.
- 2.17. The Hassocks Public Library is located on Keymer Road and is operated by West Sussex County Council.
- 2.18. Recreation and public open space is provided throughout the Parish. It includes Adastra Park within the centre of the built-up area, and comprises playing fields, tennis courts, pavilion, children's equipped play space, and a public hall with seating for 240 people. On the north-west periphery of the village is Belmont Recreation Ground, to the west is Talbot Field, and to the south is Clayton Recreation Ground. These provide a mix of sports pitches, associated pavilion, and/or informal open space.
- 2.19. There are a number of private sports clubs and facilities, and these include the Weald Lawn Tennis and Squash Racquets Club on South Bank, and Hassocks Football Club on the east side of Brighton Road. Informal open space and an equipped play space has more recently also been provided at the northern edge of Hassocks, in conjunction with the development known as Clayton Mills.

Figure 5 - Adastra Park

Housing

- 2.20. Much of the development of the Parish occurred as a result of, and following, construction of the London to Brighton railway line in the 1840s. This was typified by the construction of Victorian terraced houses, semi-detached houses and larger detached villas. More recently, the periphery of Hassocks and Keymer has been expanded by more modern housing development on land north of the built up-area boundary at Clayton Mills and to the west of the built-up area boundary along London Road.
- 2.21. The latest Census data shows that the total population of the Parish as at 2011, was 7,667 persons (an increase of 846 (12.4%) from the Census of 2001). The population comprised 20% aged 0-17; 27% aged 18-44; 27% aged 45-64; and 26% aged 65 and over.

- 2.22. The Census data from 2011 reveals there were 3,342 households, providing an average household size of 2.28 persons. This was an increase in the average household size from the 2001 Census data from 2.21 persons.
- 2.23. More recently a number of planning permissions have been granted in the Parish. These include 16 dwellings at Stafford House;⁶ 130 dwellings at Hassocks Golf Club;⁷ and 129 dwellings on land west of London Road.⁸
- 2.24. In addition, the Parish is set to experience significant growth with the delivery of the strategic allocation on land to the north of Clayton Mills. MSDP - Policy DP11, the site for strategic development for 500 new homes.

Economy

- 2.25. Census data from 2011 indicates that some 82.1% of Parish residents aged between 16-64 are 'economically' active of which most are in employment. Almost two-thirds of the workforce are 'white-collar' workers, of which almost a quarter are in 'professional' jobs. This is higher than both the rest of the District, and nationally. Some 41%⁹ have a degree level or higher qualification, compared with 30% in the country as a whole. Conversely, 7% have no qualifications compared to 15% in the country as a whole.
- 2.26. Some 15% of the workforce are self-employed and some 14% work from home. Of those that travel to work, only 9% work within 2km of home, which compares to 17% in the wider District. A total of 11% travel more than 60km to work, compared to 4% in the wider District.

Figure 6 - Keymer Road, Hassocks.

⁶ DM/15/3309

⁷ DM/16/1775

⁸ 13/03818/OUT

⁹ 2011 Economically active persons

- 2.27. This data gives a picture of a relatively highly skilled workforce, many of whom either work from home or commute significant distances to work. This reflects the relative absence of industrial and employment floorspace in the Parish, and its relative accessibility by train to higher tier centres such as London.
- 2.28. According to the 2015 District Council non-domestic rates record there are 170 business premises in the Parish. Of this, 48 are shops. Many of these are independent retailers. Collectively these provide a range of retail and business services. Retail and associated high street uses (financial services, cafes etc) are typically clustered along Keymer Road, to the east of the railway line. The main exception to this is the Garden Centre on Brighton Road, south of the Stonepound Crossroads.
- 2.29. There is a cluster of commercial premises within 'Hassocks Goods Yard' immediately south of Keymer Road and west of the railway line, and at Broadhill Craft Workshops, to the north of the main built-up area and east of Ockley Lane. There is no major industrial estate within the Parish.
- 2.30. Despite its proximity and accessibility to the SDNP, the Parish has a relatively limited level of tourism facilities. There is 1 camp site and 3 self-catering holiday lets within the Parish.

Transport

- 2.31. The Parish is located to the east of the A23 and north of the A27. Within the Parish the principal roads are the A273 which runs north-south, on the western periphery of the main built-up area, and the B2116 which runs east-west, through the centre of the main built-up area, and connects to Ditchling and Hurstpierpoint. The B2112 also runs east-west connecting Ditchling to Clayton, to the south of the main built-up area.

- 2.32. The intersection of the A273 with the B2116, known as Stonepound Crossroads, is a phased, traffic light junction. As a result of the volume of traffic at this crossroads, the local environment around the junction experiences high levels of nitrogen dioxide. This resulted in the area being designated as an Air Quality Management Area (AQMA) in March 2012. An Action Plan was approved in 2013 to reduce levels of pollution below target levels. This principally seeks to change the phased light sequencing, minimise HGV movements in the area through

Figure 7 - Village signpost

advisory alternative route signage, and encourage stationary motorists to turn-off engines, again through signage.

- 2.33. The Parish is served by the London to Brighton railway line which runs north-south, with a station located within the centre of Hassocks village. There are typically 3 trains per hour in each direction during the day. The station serves a rural hinterland and as a result, there is extensive commuter parking in and around the vicinity of the station.
- 2.34. There is a limited number of bus routes that serve the Parish. The majority operate along the A273, with a relatively limited service within and around the main built up area. The main routes operate on an hourly basis during the day.
- 2.35. There is an extensive Public Rights of Way (PRoW) network within the Parish, and this includes access to, and within, the SDNP. These are used by walkers, cyclists and horse-riders.

Chapter 3

Vision and Objectives

3. VISION AND OBJECTIVES

Introduction

- 3.1. As part of the preparation of the revised HNP, the NPWG reviewed the Vision and Strategic Objectives as contained in the previous version of the HNP. It was considered that both should be amended to reflect the current aspirations of the Parish.
- 3.2. Set out below is the updated Vision and set of Strategic Objectives.

Vision:

To ensure Hassocks, Keymer and Clayton continue to develop sustainably as a vibrant Parish within a countryside setting.

To provide access for the whole community to local social, cultural, sporting and environmental amenities.

To ensure the Parish retains its rural feel and remains a desirable place to live, work and visit. Changes that occur should protect and enhance the existing character of the Parish.

Strategic Objectives:

1. To preserve and enhance the rural character and biodiversity of the Parish and its historic buildings, maintaining gaps to neighbouring towns and villages, and having regard to the relationship of the Parish within, and part of the setting to the South Downs National Park.
2. To ensure all sections of the community have access to key local services including education, health, community services, sporting, cultural, religious, performing and social clubs, groups and shops.
3. To provide the opportunity for appropriately sized, affordable and sustainable housing, developed in sympathy with the village and its surroundings, built to very high standards of design, construction, energy efficiency and water management.
4. To encourage economic development and job creation within the built-up area of the village.

5. To develop the centre of the village to form a distinctive social hub.
6. To promote non-car modes of travel, including through accessibility to public transport and improvements in pedestrian and cycle safety; encouraging people to walk, cycle and ride in and around the Parish; to reduce the impact of traffic in terms of congestion, pollution, parking and vehicle speeds; and to encourage the use and availability of electric vehicles.
7. To ensure the whole Parish is safe, accessible and attractive to all, acting as a gateway to the South Downs National Park, encouraging tourism, and supporting healthy lifestyles and wellbeing.

Chapter 4

Environment and Heritage

4. ENVIRONMENT AND HERITAGE

Strategic Objective:

To preserve and enhance the rural character and biodiversity of the Parish and its historic buildings, maintaining gaps to neighbouring towns and villages, and having regard to the relationship of the Parish within, and part of the setting to the South Downs National Park.

Introduction

- 4.1. The Parish benefits from a rich and varied environment. This includes the scarp slopes of the south downs in the south, merging with the low weald in the north. The main built-up area of the Parish is located broadly centrally within its hinterland.
- 4.2. Immediately beyond the Parish boundaries are the settlements of Burgess Hill, Hurstpierpoint and Ditchling.
- 4.3. The Parish benefits from a range of heritage assets and areas of townscape quality, including areas of open space within the built-up area.
- 4.4. These individually and collectively positively contribute to the character of the Parish. It is important that the environment and heritage assets of the Parish are protected over the HNP period.

Figure 8 - Land to the east of Ockley Lane

Policy 1: Local Gaps

- 4.5. The main built-up area of Hassocks and Keymer is separated from Burgess Hill to the north and from Ditchling to the east and from Hurstpierpoint to the west by generally undeveloped land.
- 4.6. The importance of the separation of these settlements has previously been acknowledged in the adopted Mid Sussex Local Plan through the identification and designation of Strategic and Local Gaps.

- 4.7. The MSDP acknowledges the settlement pattern of the District makes an important contribution to the distinctive character of Mid Sussex. The Strategic Objectives of the MSDP seek “to promote well located and designed development that reflects the District’s distinctive towns and villages, retains their separate identity and character and prevents coalescence.”
- 4.8. In order to achieve the Strategic Objectives of the MSDP, Policy 13: Preventing Coalescence of the MSDP, sets out a framework to prevent coalescence between settlements. Furthermore, it confirms the importance that the separate identity of settlements is maintained and people have a sense of having left one settlement before arriving in the next.
- 4.9. The Policy sets out support for the identification of Local Gaps in Neighbourhood Plans. It does not however identify specific areas for protection. In order for Local Gaps to be identified, MSDC require “robust evidence that development within the gap would individually or cumulatively result in coalescence and the loss of the separate identity and amenity of nearby settlements”. Furthermore, the policy requires that it must be demonstrated that existing local and national policies cannot provide the necessary protection to these areas.
- 4.10. In light of the requirements of the MSDP, the HNP is underpinned by a background paper¹⁰ which reviews Policy 1 and Policy 2 of the Submission HNP (2016) against the requirements of MSDP DP13: Preventing Coalescence, specifically to assess whether there is a need for a gap policy in the HNP.
- 4.11. In reviewing whether there is a need for a gap, the background paper has taken account of changes to planning policy, both locally and nationally, and also had regard to planning decisions for proposals on land within the previously proposed gap areas. These include approval for up to 97 homes on land to the west of London Road¹¹ and refusal on appeal for 130 homes on land at Friars Oak.
- 4.12. The proposed development of 97 homes on land west of London Road was the subject of a complex planning appeal process. Ultimately, planning permission was granted in March 2017,¹² by the Secretary of State, having regard to, and following, a Public Inquiry in August 2016. Although planning permission was granted, the appointed Inspector acknowledged that the gap between Hurstpierpoint and Hassocks serves an important planning function in preventing the coalescence of the two settlements, and maintaining their separate identities and amenities, and this is in accordance with the NPPF. The Inspector concluded that with appropriate mitigation, the purpose of the gap and its character would be unduly changed

¹⁰ Revised Hassocks Neighbourhood Plan Local Green Space Policy Review, October 2018

¹¹ APP/D3830/W/14/2226987

¹² APP/D3830/W/14/2226987

by the proposed development. The mitigation referred to by the Inspector included the retained and new planting in the outer open space of the site, to enable the delivery of a softer edge to this part of the settlement than currently exists.¹³

4.13. As part of the preparation of the background paper, a Landscape and Visual Assessment has been undertaken. This demonstrates that:

- The land within the respective gaps retains a strong rural character which reflects key characteristics as described in the HNP Landscape Character Assessment; and
- The land within the respective gaps is of importance in maintaining the setting and identity of the individual settlements.

4.14. In light of the above, the HNP proposes a local gap policy within the revised HNP. The policy seeks to protect the area to the north of the main built-up area of Hassocks and Keymer and areas to the east and west of the main built-up area of Hassocks, as defined on the Proposals Map. These areas are considered important and the HNP seeks to keep these areas free from development in the long-term in order to secure the objectives of the Local Gap. Where there are buildings, or groups of buildings, within the Local Gap, these will be treated as part of the Local Gap.

Policy 1: Local Gap

Local Gaps have been defined and will be safeguarded between:

- a. Keymer/Hassocks and Ditchling;**
- b. Keymer/Hassocks and Hurstpierpoint; and**
- c. Keymer/Hassocks and Burgess Hill.**

as defined on the Proposals Map with the objectives of preventing coalescence and retaining the separate identity and amenity of settlements.

Development will be supported within the Local Gap where:

- 1. It is necessary for the purposes of agriculture, or some other use which has to be located in the countryside; or**
- 2. It is a scheme for housing that is in accordance with MSDP Policy DP6 (1-3) and includes an appropriate landscape buffer to strengthen the purposes of the**

¹³ See Paragraph 207 of APP/D3830/W/14/2226987

Local Gap; and

it would not compromise individually or cumulatively the objectives and fundamental integrity of the gaps between Hassocks and the settlements of Ditchling, Hurstpierpoint, and Burgess Hill.

Policy 2: Local Green Spaces

- 4.15. The NPPF enables the designation of land as Local Green Space (LGS) through local and neighbourhood plans.
- 4.16. Paragraph 99 of the NPPF allows communities to identify and protect green areas of particular importance to them. The NPPF notes LGS's should only be used where the green space is:
- in reasonably close proximity to the community it serves;
 - demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquility, or richness of its wildlife; and
 - local in character and not an extensive tract of land.¹⁴
- 4.17. Having regard to these criteria, it is considered that there are a number of green spaces both within, and around, the built-up areas of the Parish that warrant protection.
- 4.18. The HNP/Policy is supported by a background paper¹⁵ which sets out and demonstrates how the identified areas meet the requirements of the NPPF. This paper was originally prepared to support the Submission Version HNP (June 2016). It has been updated to take account of changes to national planning policy and to reconsider whether all, or part of the previously proposed LGS sites meet the criteria of the NPPF. In addition to consideration of previous LGS's proposed, the background paper also assesses an additional location to be protected.
- 4.19. The background paper includes a traffic light assessment to provide an overview of whether each site fully, partially, or does not meet the requirements of the NPPF. This concluded all of the sites assessed, wholly or predominantly, meet the NPPF criteria and are therefore proposed as LGS in the HNP. These areas are defined on the accompanying Proposals Map. Within such areas the HNP seeks to protect these green areas from development.

¹⁴ Paragraph 100 of the NPPF

¹⁵ Revised Hassocks Neighbourhood Plan, Local Green Space Policy Review, October 2018

- 4.20. The purpose of the proposed designations are to provide special protection against the inappropriate development of areas of particular local importance as green space. Where the LGS benefits from an existing public access and/or recreational use, designation as an LGS would not prohibit the use of that LGS for future public access and/or recreational uses.

Policy 2: Local Green Spaces

The Hassocks Neighbourhood Plan designates the following locations as Local Green Spaces (as shown on the Proposals Map):

- 1. Land to the north of Shepherds Walk (LGS1).**
- 2. Land at the Ham (LGS2).**
- 3. Land to the south of Clayton Mills (LGS3).**
- 4. Land to the east of Ockley Lane (LGS4).**
- 5. Land at south of Downlands (LGS5).**
- 6. Land to the west of the railway line (LGS6).**
- 7. Land at Pheasant Field (LGS7).**
- 8. Land at Clayton Mills (LGS8).**

Development proposals, which conflict with the purpose of this designation, will be resisted in these areas.

Policy 3: Green Infrastructure

- 4.21. The NPPF defines 'green infrastructure' as a *"network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental quality of life benefits for local communities."*¹⁶
- 4.22. Within the Parish, green infrastructure includes woodland and hedges, parks and open spaces, recreational space (e.g. golf course), watercourses, PRow, allotments, tree lined streets and aged or veteran trees.¹⁷ It also includes an important area of species rich chalk grassland that is recognised and protected by its designation as part of an SSSI.
- 4.23. The benefits that result from this green infrastructure include an enhancement in the visual appearance of the area, provide access for residents to sport, recreation and quiet

¹⁶ See Annex 2 of the NPPF

¹⁷ See definition in Annex 2 of the NPPF

enjoyment, connected networks for wildlife, help to reduce flood risk, facilitate non-car modes of travel, and provide allotments. Well managed green infrastructure contributes to wider economic and social benefits, improved physical and mental health outcomes, economic competitiveness and greater attraction to tourists.

- 4.24. The HNP seeks to both conserve and enhance existing green infrastructure assets, and ensure new development contributes to the enhancement of this network.

Policy 3: Green Infrastructure

Development proposals, which seek to conserve, maintain or enhance the existing green infrastructure network will be supported.

Where proposals include the provision of additional green infrastructure these will be supported where:

- 1. They seek to link to the existing path and open space networks;**
- 2. They provide off road access for walking, cycling and horse-riding;**
- 3. Planting contributes to wildlife and links to existing woodland, hedges and streams; and**
- 4. Proposals include the planting of native species.**

Proposals, which would result in the loss of existing green infrastructure, will be resisted unless it can be demonstrated that the development proposals brings new opportunities which mitigates or compensates any loss whilst ensuring the protection of the existing ecosystem.

Policy 4: Managing Surface Water

- 4.25. The NPPF advises the planning system should support the transition to a low carbon future in a changing climate, taking full account of flood risk and coastal change.¹⁸
- 4.26. The Flood and Water Management Action 2010 requires County Councils to lead the coordination of flood risk. In light of this, West Sussex County Council (WSCC) have prepared the West Sussex Local Flood Risk Management Strategy. This sets out how WSCC carries out its flood risk responsibilities and outlines a strategy to define how local flood risk will be managed in the county.

¹⁸ Paragraph 148 of the NPPF

- 4.27. With respect to Mid Sussex, the Strategy confirms the District contains six areas that are at risk of flooding. These are Burgess Hill, Copthorne, Hassocks, Haywards Heath and Lindfield, East Grinstead, and Sayers Common.
- 4.28. The Strategy confirms, that properties in Hassocks are largely at risk from surface water flooding. It identifies a number of 'wet spots' and the number of residential properties and businesses susceptible to flood risk by flood source. A total of 685 residential properties and businesses in Hassocks are susceptible to flood risk. Of these, 525 properties are identified as at risk of surface water flooding; 105 are identified as at risk of river and flooding; and 55 are at risk of flooding from a combination of both surface water and river and sea.¹⁹
- 4.29. Given the local flood risk issues, the Hassocks, Hurstpierpoint, Keymer and Ditchling Transition (HKD) group commissioned a project to gain a better understanding of flood risk in the local area. This work was funded by West Sussex County Council's Operation Watershed fund.
- 4.30. The aim of the project was to:
- Digitally map areas for potential green infrastructure (GI) interventions in Hassocks;
 - To engage with the public of Hassocks to map areas of where surface flooding and river flooding have historically happened in the town;
 - To map areas of where surface flooding is a current concern;
 - Assess the potential impact of the GI interventions in Hassocks;
 - To work with the public to identify areas where GI could be installed in the village of Hassocks;
 - To engage the public and promote GI to the wider public in Hassocks and beyond; and
 - To create one GI intervention in the town in 2017.
- 4.31. The Report²⁰ highlights measures which could be designed into the townscape to help manage local flood risk.
- 4.32. The HNP wishes to support the implementation of local measures and initiatives to ensure flood risk is managed appropriately.

¹⁹ West Sussex Local Flood Risk Management Strategy, Figure 6

²⁰ Hassocks Green Infrastructure Project, Community and Neighbourhood Sustainable Urban Drainage Report, June 2017

Policy 4: Managing Surface Water

Development proposals which seek to reduce the risk of surface water flooding will be supported. Development proposals should seek to reduce existing run-off rates in the first instance.

Development proposals which incorporate sustainable urban drainage techniques to manage surface water will be supported. Where technically feasible sustainable drainage techniques should include infiltration measures that reflect natural drainage patterns and manage water as close to its source as possible.

Development proposals which seek to incorporate local measures to manage surface water will be supported.

Policy 5: Enabling Zero Carbon

- 4.33. Global heating is a world-wide threat that requires concerted action to minimise its adverse effects.
- 4.34. The Mid Sussex District Council Sustainability Strategy 2018-2023 sets out MSDC's approach to sustainability and delivering sustainable development. This is supported by a Sustainability Action Plan to help co-ordinate and structure sustainability actions and ensure they are implemented in a meaningful and pragmatic way.
- 4.35. The Sustainability Action Plan aims to:
- Embed sustainability in all corporate actions;
 - Support communities in implementing sustainable actions and becoming more resilient to a changing climate; and
 - Support businesses in achieving savings through energy efficiency and other sustainability initiatives.
- 4.36. The HNP supports the aims of the Sustainability Action Plan. In particular, the HNP wishes to support proposals which seek to implement sustainable measures including those which increase the use and supply of renewable and low carbon energy and heat. In addition, the HNP seeks to support proposals which make provision for, and support the provision of charging facilities for charging electric vehicles.

Policy 5: Enabling Zero Carbon

Support will be offered for development proposals that maximise the opportunity to include sustainable design features, providing any adverse local impacts can be made acceptable.

All residential development proposals that modify existing buildings (including extensions) should seek to maximise the inclusion of energy-saving measures and renewable energy generation.

Planning applications for developments of new dwellings must be accompanied by an Energy Assessment using the standard assessment procedure* (SAP) to demonstrate how carbon dioxide emissions are to be minimised onsite.

All new residential development will be required to demonstrate that the net maximum heat energy requirement of the dwelling calculated using the SAP is 15 kWh/m²/year or less**/***.

Proposals which make provision for charging electric vehicles at each dwelling (where feasible) and on-street; and making parking areas charging ready will be supported.

* For a definition of this process see Part L1 of the Building Regulation.

/ A negative value would mean the development is expected to be a net exporter of energy to the grid or to a district heating system.

A 15 kWh/m²/year is the German Passivhaus standard. However this Policy is not saying that Passivhaus standard should be adopted, as the UK climate is better suited to automated domestic heating and ventilation controls that were not available when the Passivhaus standard was developed; but it does take the Passivhaus level of heating energy efficiency as the objective standard to be achieved.

Policy 6: Development Proposals Affecting the South Downs National Park

- 4.37. The South Downs was designated as a National Park in April 2011. It stretches from Lewes in the east to Winchester in the west, and covers an area of approximately 1,627 square kilometres. It includes the long distance footpath, the South Downs Way.
- 4.38. The statutory purposes for National Parks is set out in the Environment Act 1995 as:

1. *To conserve and enhance the natural beauty, wildlife and cultural heritage of the area;*

2. To promote opportunities for the understanding and enjoyment of the special qualities of the national park by the public.

- 4.37. The southern and eastern boundary of the Parish lies in the SDNP, as identified in Figure 2.
- 4.38. The HNP recognises the importance of the South Downs National Park and seeks to positively support the purposes of the Park and the duty of the Park Authority in discharging its functions with respect to land use.
- 4.39. In addition, the HNP acknowledges the areas of land surrounding the SDNP makes a positive contribution to the setting of the SDNP. The HNP therefore wishes to protect the setting of the SDNP from inappropriate development.

Policy 6: Development Proposals Affecting the South Downs National Park

Development proposals within the South Downs National Park will be supported where they:

- 1. Have regard to the purposes and duty of the Park Authority; and**
- 2. Conserve and enhance the landscape character, scenic beauty, wildlife and cultural heritage of the Park.**

Development proposals on land outside of, but contributing to, the setting of the South Downs National Park will be supported where proposals:

- 3. Do not detract from, or cause detriment to, the special qualities and tranquility of the South Downs National Park; and**
- 4. Do no significantly harm the South Downs National Park or its setting.**

Policy 7: Development in Conservation Areas

- 4.40. The Parish contains two Conservation Areas. These comprise the historic core of Keymer, and the historic core of Clayton. The Conservation Areas include a number of Listed Buildings.
- 4.41. The NPPF makes clear that Conservation Areas and Listed Buildings are ‘heritage assets’ and are an irreplaceable resource that should be conserved in a manner appropriate to their

significance, so that they can be enjoyed for their contribution to the quality of life for existing and future generations.²¹

- 4.42. The Parish Council supports this requirement, and recognises the importance of heritage assets and the contribution they make to the quality of the area, in terms of local character and distinctiveness, and their associated cultural, economic and environmental benefits.

Figure 9 - Keymer Church

²¹ Paragraph 184 of the NPPF

Policy 7: Development in Conservation Areas

Development proposals which seek to conserve and enhance the Keymer Conservation Area and Clayton Conservation Area will be supported.

The following special features have been identified in the Keymer Conservation Area:

1. Keymer Terrace and the stone wall by the church;
2. The Church and its setting;
3. Properties in the Crescent;
4. Properties and features of Lodge Lane;
5. The Greyhound Pub;
6. The bend in Keymer Road;
7. Views into an out of the Conservation area; and
8. The use of traditional building materials.

Any development in the conservation area must conserve and enhance these features.

The following special features have been identified in the Clayton Conservation Area:

9. The Church and its setting;
10. Former farm buildings associated with Clayton Farm;
11. Clayton Court Barn;
12. The Manor House;
13. Clayton Castle;
14. Building materials including flint, brick, hanging tiles and roof tiles;
15. Views out of the Conservation Area to the open downland, including the Jack and Jill Windmill;
16. Rural setting with the Downs rising steeply to the south;
17. Rural character of Underhill Lane; and
18. The sense of enclosure created by the narrow sunken lane.

Any development in the conservation area must conserve and enhance these features.

Policy 8: Air Quality Management

- 4.43. The Parish contains a designated Air Quality Management Area located at the Stonepound Crossroads. The AQMA was designated in March 2012 as a result of the high levels of

nitrogen dioxide being likely to breach the Air Quality (England) Regulations 2000 (as amended). This area includes a number of residential properties that are immediately to the south-east of the crossroads (1-6 Overcourt; The Coach House; and Shouldarry).

- 4.44. The main reasons for the crossroads being affected by air pollution is the volume of road traffic and the stop-start routine of driving conditions at peak times, caused by the queuing traffic at the traffic lights.
- 4.45. In 2013 MSDC approved an Action Plan, noting that a 'do-nothing' option would fail to bring about improvements in nitrogen dioxide levels. The Action Plan includes three main measures to (i) change light sequencing to reduce stationary times; (ii) minimise HGV movements through advisory alternative route signage; and (iii) reduce pollution from queuing vehicles by encouraging drivers through signage to turn-off engines when stationary. There were also a series of other measures proposed that were noted to be less likely to have a significant impact.
- 4.46. HPC supports proposals which will reduce nitrogen dioxide levels within its area, and reduce the harmful impacts on its residents.
- 4.47. The District Council note that for the AQMA to be revoked, annual air quality monitoring data will need to show levels of air pollution at consistently below the target level.
- 4.48. HPC consider that development should not be supported where it has an unacceptable adverse effect on the AQMA, or where a proposed use or users within the AQMA would be unacceptably adversely effected by the air quality.
- 4.49. HPC do not wish to support proposals which could lead to unacceptable adverse effect upon air quality within the AQMA, in line with European Union air quality standards.
- 4.50. HPC consider this position should be maintained unless, and until, the levels of air pollution are demonstrably below the target level in the Regulations, sufficient to enable the AQMA to be revoked.

Policy 8: Air Quality Management

Development will be supported where it would not have an unacceptable adverse effect upon air quality within the Air Quality Management Area.

Policy 9: Character and Design

- 4.51. The Parish contains a broad range of architecture styles and townscapes. This reflects its evolution from the medieval origins of the Church of St John the Baptist at Clayton, through to the Georgian farmsteads and manor houses, the ribbon development of settlements along main access routes, and the rapid growth of Keymer and Hassocks following the construction of the railway line in the 1840s, up to the current day.
- 4.52. In support of the preparation of the HNP, a Townscape Appraisal has been undertaken of the main built-up area of Hassocks and Keymer.
- 4.53. The purpose of the Appraisal was to assess the village of Hassocks within the built form boundary to determine a baseline for the future. The study goes on to assess the local distinctiveness of the village, helping to determine characteristics to be appreciated and strengthened when more development takes place.
- 4.54. The Appraisal identifies 14 Local Townscape Character Areas. These comprise: Stonepound; South Bank; London Road; Priory; Shepherds Walk; Home Estate; Butchers Wood; Dale; Clayton Mills; Adastra; Church Mead; Keymer, Hurst Road; and Village Centre. Each area was surveyed to determine its particular and discernible sense of place.

- 4.55. The Appraisal concludes the overall finding is that the village of Hassocks has a particular character derived from its location, views, topography, spatial qualities and historical development which makes it distinctive. The Appraisal confirms the village does not have the homogenous quality of its medieval neighbours due to its continuous development in the 19th, 20th and 21st century. The Appraisal confirms the variety enlivens the villages and give a spacious village centre, compared with the villages either side of Hassocks.

Figure 10 - Parklands Road

- 4.56. The Appraisal confirms the use of local materials, especially local soft-coloured red brick with plain, soft brown, clay roof and red wall tiles give the built form cohesion and local distinctiveness. Furthermore, it confirms small-scale housing with generous front gardens and wide grass verges give a spacious feel that is typical across the major part of the village.

Chapter 5

Community Infrastructure

5. COMMUNITY INFRASTRUCTURE

Strategic Objectives:

- To ensure all sections of the community have access to key local services including education, health, community services, sporting, cultural, religious, performing and social clubs, groups and shops.
- To develop the centre of the village to form a distinctive social hub.

Introduction

- 5.1. Community infrastructure is critical to the well-being of Parish residents. Ensuring adequate provision, in locations that are readily accessible to the community, is fundamental to the local quality of life. This includes open space, recreation facilities, local community facilities (e.g. Parish Hall, library), education provision and health services. These relate to all sectors of the community from younger to older persons.
- 5.2. Ensuring the delivery of such adequate infrastructure often lies outside the scope of a Neighbourhood Plan, and is reliant on other organisations. However, insofar as this Plan can, control will be exercised, and support offered, for the provision and retention of necessary community infrastructure both in terms of timing and quality.

Policy 10: Protection of Open Space

- 5.3. The NPPF defines open space as *“all open space of public value, including not just land, but also areas of water (such as rivers, canals, lakes, reservoirs) which offer important opportunities for sport and recreation and can act as a visual amenity.”*²³
- 5.4. This definition is considered to include, but not be limited to, formal space such as sports pitches and tennis courts etc, informal space, such as parkland, and children’s play

Figure 11 - Adastra Park

²³ Annex 2 of the NPPF

space, including equipped areas both for young and older children.

- 5.5. The Parish benefits from a range of such open space, as well as the wider open space within the South Downs National Park. Individually and collectively, these areas bring social benefits and offer important opportunities for sport and recreation, with associated benefits for the health and social well-being of the resident population and visitors. Furthermore, open space can provide important ecological and environmental benefits, including in relation to the character and attractiveness of the area.
- 5.6. The NPPF confirms access to a network of high quality open spaces and opportunities for sport and physical activity is important for the health and well being of communities.²⁴
- 5.7. The HNP identifies specific areas of public open space within the Parish to be protected from development. The areas identified provide access to open space which provide health and recreational benefits. Furthermore it is considered these areas have an ecological value and contribute to the Parish's green infrastructure.
- 5.8. HPC seek to resist the loss of existing open space; or alternatively, where such loss is unavoidable, secure compensatory mitigatory provision. Furthermore, it is considered that development proposals should include the provision of open space within schemes, to the extent necessary to meet the need arising from the associated development.

Policy 10: Protection of Open Space*

Development proposals, which provide a mix of formal and informal open space to meet local need, will be supported. Open space is to be of high quality and serve local need.

The Proposals Map identifies the following areas of public open space:

- a. Land at the Golf Club;
- b. Land at Ham Fields;
- c. Land at Clayton Mills;
- d. Land comprising the strategic allocation to the north of Clayton Mills, to be agreed through the planning application, in accordance with MSDP Policy DP11;
- e. Land at Clayton Recreation Ground;
- f. Land at Adastra Park;
- g. Land at Talbot Fields; and
- h. Land at Belmont playing fields.

²⁴ Paragraph 91 of the NPPF

Development proposals for the replacement of existing open space, including the identified areas of public open space, will be supported where:

1. Equivalent (in qualitative and quantitative terms) or enhanced open space is provided to serve local needs; and
2. Proposals for the replacement of open space ensure the replacement is made available before the loss of the existing.

Development proposals which result in the loss of existing open space, including the identified areas of public open space, will not be supported unless:

3. As assessment has been undertaken which has clearly shown the facility to be surplus to requirements; or
4. The loss resulting from the proposed development would be replaced by equivalent, or better, provision in terms of quantity and quality in a suitable location; or
5. The development is for alternative sports and recreational provision, the needs for which clearly outweigh the loss.

** Open space referred to in the context of the above policy is defined as per Annex 2: Glossary, National Planning Policy Framework.*

Policy 11: Outdoor Play Space

- 5.9. In support of the retention of existing forms of open space, it is considered desirable and appropriate to specifically seek residential development of 5 units or more, to provide outdoor play space. The overall quantum of space will be determined having regard to the prevailing standards of the District, or as calculated by reference to the need arising from the associated development.

Figure 12 - Play Space Clayton Mills

- 5.10. There is concern locally that too often such play areas, provided in conjunction with residential development comprise a limited number of low quality pieces of equipment, poorly sited in relation to the wider development, and demarcated by austere boundary treatment.
- 5.11. HPC wish to encourage the provision of children's equipped play areas and play space for young people, in creative and imaginative forms that are fully integrated and relate well to the overall development scheme.

Policy 11: Outdoor Playing Space

Development proposals of 5 or more homes will be required to provide play areas and associated equipment. This should be preferably provided on site or alternatively financial contributions should be provided towards both the provision and long term maintenance of off site community facilities.

Policy 12: Community Facilities

- 5.12. The Parish benefits from a range of community facilities. These include, but are not limited to, community halls, library, schools, medical centre, public houses, religious meeting venues, allotments and cemeteries. Individually and collectively these contribute to the well-being of the local community.

Figure 13 - Parklands Allotments

- 5.13. HPC therefore seek to resist the loss of these facilities; or alternatively, where such loss is unavoidable, secure compensatory mitigatory provision. Proposals for the enhancement of such facilities, either by alteration, extension or replacement will be supported.

Policy 12: Community Facilities

Development proposals which result in the loss of community facilities will not be supported.

Development proposals for the alteration and/or replacement of community facilities will be supported where:

1. Equivalent (in qualitative and quantitative terms) or enhanced facilities are provided to serve local needs; and
2. Proposals for the replacement of a community facility ensure the replacement facility is made available before the closure of the existing facility.

Aim 1: Assets of Community Value

- 5.14. The Localism Act 2011²⁵ enables the nomination of Assets of Community Value (ACV) by a community group that is locally connected to the area. In order for land and/or building(s) to be nominated they must meet the requirements of the Localism Act. The nomination must set out and demonstrate *“the land and/or building(s) in current use, (or in the recent past), furthers the social wellbeing or social interests of the local community”*. In addition, nominations must demonstrate *“it is realistic to think that the land and/or building(s) will continue to further the social wellbeing or social interests of the local community.”*
- 5.15. There is a statutory duty upon local authorities to maintain a list of ACV. Where any of the ACV are put up for sale, the community is given time to prepare a bid and can attempt to buy the asset themselves.
- 5.16. HPC wish to support nomination(s) which are in line with the legislative requirement of the Localism Act and complement the Vision and Strategic Objectives of the HNP.

Aim 1: Assets of Community Value

Support is offered for nominations for building(s) or land in the Parish to be listed as an Asset of Community Value, where such proposals reflect the legislative requirements to further the social wellbeing or social interests of the local community.

²⁵ Part 5 Community Empowerment, Chapter 3 - Assets of Community Value

Policy 13: Education Provision

- 5.17. The Parish currently contains 3 state education schools. These are Hassocks Infants, The Windmills Junior, and Downlands Community School (Secondary). Recent provision of additional school places has occurred at primary level to deliver a 3-form entry at both Hassocks Infants and The Windmills Juniors.
- 5.18. The MSDP advises there are known deficiencies in primary school education in Hassocks, with the existing primary school operating at capacity. In light of this, the strategic allocation at Clayton Mills makes provision of land for a new primary school, which MSDC advise will alleviate existing deficiencies as well as providing extra capacity.
- 5.19. The delivery of adequate school places to serve the local resident population is the responsibility of the Local Education Authority (LEA), West Sussex County Council. HPC wish to support the provision of a two-form entry primary school in the Parish and will therefore work with the Local Education Authority, to ensure a school is provided to meet demand.

Policy 13: Education Provision

The provision of a two-form entry primary school within the Parish will be supported.

The Parish Council will work with the Local Education Authority, Mid Sussex District Council, and developers to ensure a school is provided to meet growing demand in the Parish and in accordance with other policies in the HNP.

Aim 2: Education Facilities

- 5.20. In addition to the need for a Primary school, HPC consider that other educational facilities may be required over the lifetime of the HNP, but acknowledge that these requirements are not yet known.
- 5.21. HPC supports the provision of adequate facilities to meet the needs of the local resident population.

Aim 2: Education Facilities

Support will be offered for the delivery of adequate education facilities to meet the needs of all ages of the local resident population.

Aim 3: Healthcare Facilities

- 5.22. The Parish is currently served by a health centre in Windmill Avenue. The delivery of adequate healthcare is the responsibility of the Local Clinical Commissioning Group.
- 5.23. Whilst, at this stage, no requirement for additional facilities has been identified, it is acknowledged that additional facilities may be required over the lifetime of the HNP.
- 5.24. HPC supports the provision of adequate healthcare facilities to meet the needs of the local resident population.

Aim 3: Healthcare Facilities

Support will be offered to the Clinical Commissioning Group to deliver adequate locally based health care provision in the Parish.

Chapter 6

Housing

6. HOUSING

Strategic Objective:

To provide the opportunity for appropriately sized, affordable and sustainable housing, developed in sympathy with the village and its surroundings, built to very high standards of design, construction, energy efficiency and water management.

Introduction

- 6.1. A background paper on housing,²⁶ amongst other matters, sets out HPC's position in light of the adoption of the MSDP.
- 6.2. The MSDP 2014-2031 was adopted on 28th March 2018. It replaces the Mid Sussex Local Plan 2004 (other than the saved Local Plan policies). It does not apply to that part of the District within the SDNP.
- 6.3. With respect to meeting housing need, the MSDP has established the objectively assessed housing need (OAHN) of the District as 14,892 dwellings over the Plan period. Provision is also made for 1,498 dwellings to ensure unmet need is addressed in the Northern West Sussex Housing Market Area. This results in a District Plan minimum housing requirement over the Plan period of 16,390.
- 6.4. The MSDP will facilitate the delivery of an average of 876 dwellings per annum (dpa) until 2023/24; and thereafter, an average of 1,090 dpa between 2024/2025 and 2030/2031, subject to there being no further harm to the integrity of European Habitat Sites in Ashdown Forest.
- 6.5. Policy DP4 of the MSDP, sets out how the Districts OAN will be delivered. This comprises:
 - Strategic development north and north-west of Burgess Hill: 3,500 dwellings;
 - Land north of Clayton Mills: 500 dwellings;
 - Windfall allowance: 450 dwellings; elsewhere in the District, and
 - As allocated through future Neighbourhood Plans and the Site Allocations document: 2,439 dwellings.

²⁶ Background Paper: Housing Hassocks Neighbourhood Plan, October 2018

- 6.6. With respect to Neighbourhood Plans, Policy DP4 sets out the spatial distribution of the housing requirement by reference to settlement categories. The MSDP identifies five settlement categories of which Burgess Hill, East Grinstead and Haywards Heath fall within Settlement Category 1 and are required to deliver the majority of the housing requirement over the Plan period.
- 6.7. Hassocks and Keymer fall within Settlement Category 2 (together with Copthorne, Crawley Down, Cuckfield, Hurstpierpoint and Lindfield). Collectively MSDP Policy DP4 identifies a minimum requirement over the Plan period for Category 2 settlements to provide 3,005 dwellings, with the minimum residual from 2017 onwards (i.e. accounting for existing completions and commitments) of 838 dwellings.
- 6.8. With respect to the Neighbourhood Plan Strategy, the MSDP provides clarity between the District housing requirement and the role of individual Neighbourhood Plans in meeting this. It shows the minimum residual amount of development for each settlement over the rest of the Plan period, as at April 2017.
- 6.9. For Hassocks, the MSDP sets out:
- A minimum requirement of 882 dwellings to be delivered over the Plan Period (based on stepped trajectory);
 - A minimum requirement of 519 dwellings to be delivered up to 2023/24 (based on 876 dpa);
 - The number of commitments and completions in Hassocks, as at 1 April 2017 amounts to 882 dwellings;²⁷ and
 - In light of the number of commitments and completions in Hassocks, the minimum residual number of dwellings to be delivered from 2017 onwards is zero.
- 6.10. The revised NPPF makes clear that strategic policy-making authorities should establish a housing requirement figure for designated neighbourhood areas.²⁸ Whilst this post-dates the MSDP, the District Plan Inspector required a similar exercise be undertaken as part of the preparation of the MSDP.²⁹ This resulted in the terms of policy DP4: Housing, and the supporting text, including the Table on page 36 of the MSDP, as detailed above.
- 6.11. The MSDP therefore requires within Hassocks Parish, the delivery of a minimum housing requirement of 882 dwellings over the MSDP period. This housing requirement figure is met

²⁷ 882 includes strategic allocation to the north of Clayton Mills

²⁸ See Paragraph 65 of NPPF 2018

²⁹ See J Bore letter of 20th February 2017

by existing commitments and completions as at April 2017 which includes the strategic site allocation of land north of Clayton Mills (MSDP DP11).

- 6.12. It is noted that this number is substantially higher than any of the other settlements that are identified at Category 2 in the settlement hierarchy.³⁰
- 6.13. In light of the above, HPC concluded that there is no requirement to make housing allocation provision for additional residential development within the Parish over the HNP period. The HNP does however, support the delivery of further windfall development within the Parish, subject to compliance with policies in the HNP.

Policy 14: Residential Development Within and Adjoining the Built-Up Area Boundary of Hassocks

- 6.14. The NPPF defines windfall development as “sites not specifically identified in the development plan.”
- 6.15. Paragraph 68 of the NPPF acknowledges small and medium sized sites can make an important contribution to meeting the housing requirement of an area, and are often built-out relatively quickly. In order to promote the development of a good mix of sites Local Planning Authorities should “support the development of windfall sites through their policies and decisions, giving great weight to the benefits of using suitable sites within existing settlements for homes.”
- 6.16. MSDP Policy DP6: Settlement Hierarchy sets out support for development within towns and villages with defined built-up area boundaries. The Policy states that outside of the defined built-up area boundaries, the expansion of settlements will be supported where:
- The site is allocated in the District Plan, a Neighbourhood Plan or subsequent Development Plan Document or where the proposed development is for fewer than 10 dwellings; and
 - The site is contiguous with an existing built-up area of the settlement; and
 - The development is demonstrated to be sustainable, including by reference to the settlement hierarchy.
- 6.17. In accordance with the NPPF, HPC wish to plan positively for the future of the Parish. Therefore, and in line with MSDP DP6, HPC wish to support further windfall development within the built-up area boundary; and outside of the built-up area boundary, where this is on land that lies outside of the identified Local Gap and South Downs National Park, subject to a number of criteria.

³⁰ See Policy 6: Settlement Hierarchy of the MSDP and Table on page 26 of the MSDP

- 6.18. Given the historic supply of windfall development within the Parish, it is anticipated this will facilitate the delivery of further residential development over the HNP period, in excess of the minimum housing requirement figure in the MSDP.

Policy 14: Residential development within and adjoining the built-up area boundary of Hassocks

Development proposals for residential development on unidentified sites within the defined built-up area of Hassocks will be supported where proposals:

1. Are of an appropriate nature and scale; and
2. Positively respond to the character and function of the area.

Development proposals for residential development outside of the built-up area of Hassocks will be supported where:

3. The proposed development is for fewer than 10 dwellings; and
4. The site is contiguous with an existing built-up area of the settlement; and
5. The site is outside of the South Downs National Park; and
6. The development is demonstrated to be sustainable, including by reference to Hassock's position in the settlement category hierarchy of MSDP Policy DP6; and
7. The development is located within the Local Gap, it complies with the criteria of Policy 1: Local Gap.

Policy 15: Hassocks Golf Club

- 6.19. Hassocks Golf Club is an existing 18-hole golf course with an associated clubhouse and infrastructure. It is open to both members and non-members. It is located on the north-west edge of the built-up area of Hassocks and Keymer, on the west side of the A273 and north and west of Reed Close and Pavilion Close.

Figure 14 - Hassocks Golf Club

- 6.20. The previous Submission HNP allocated land at Hassocks Golf club for up to 130 residential units and a 9 hole golf course facility, subject to a number of criteria.

- 6.21. An application to comprehensively redevelop the site for up to “130 residential units, replacement golf clubhouse and new driving range, new golf holes and associated infrastructure” was submitted in April 2016, and subsequently approved by MSDC in June 2017.³¹
- 6.22. Since the grant of planning permission, a further application for the redevelopment of the site comprising of 165 residential units has been submitted to MSDC.³² This application was resolved to be approved at the MSDC District Planning Committee on 29 November 2018.
- 6.23. The principle of development has been established on the site through the grant of planning permission. HPC wish to ensure any future applications on the site are developed in line with the Vision and Strategic Objectives of the HNP. The HNP therefore includes a policy to support the development of the site in line with the Vision and Strategic Objectives of the HNP.

Policy 15: Hassocks Golf Course

Residential development proposals on land at Hassocks Golf Club (as identified on the Proposals Map) will be supported where proposals:

- 1. For residential development do not extend into the Local Gap (as identified on the Proposals Map);**
- 2. Protect ancient woodland;**
- 3. Allow for the retention of existing mature trees and hedges;**
- 4. Protect and do not adversely affect heritage assets, including Friars Oak House and its rural setting;**
- 5. Provide a suitable mix of dwelling types and sizes to meet the needs for current and future households;**
- 6. Protect the amenity of existing residential properties bordering the site;**
- 7. Provide a mix of high quality formal and informal open space;**
- 8. Include details for the maintenance of public open space;**
- 9. Provide land to the west of Belmont Recreation Ground for formal/informal open space;**

³¹ DM/16/1775

³² DM/18/2616

- 10. Provide suitable access and parking; and**
- 11. Maximise opportunities to facilitate and provide the increased use of alternative means of transport to private non-carbon fuelled vehicles.**

Policy 16: Land to the North of Clayton Mills and Mackie Avenue

- 6.24. The previous Submission HNP allocated land to the north of Clayton Mills and Mackie Avenue for up to 140 units.
- 6.25. As part of the MSDP Examination, MSDC were directed to undertake further work to identify sites or broad areas of land for potential development in order to meet the minimum housing requirement for the MSDP period.
- 6.26. The MSDP, subsequently allocated part of the site and further land to the north, for 500 dwellings and associated infrastructure, including a new primary school (MSDP Policy DP11).
- 6.27. HPC made representations to the Inspector of the MSDP setting out strong objections to the proposed allocation of 500 dwellings and associated infrastructure. Notwithstanding this, the Inspector concluded that the site should be allocated, and this is reflected in MSDP Policy DP11.
- 6.28. This allocation has established the principle of development of the site. HPC nonetheless wish to ensure any future application(s) on the site is developed in line with the Vision and Strategic Objectives of the HNP. The HNP therefore, includes a policy to support the development of the site in line with the Vision and Strategic Objectives of the HNP.

Policy 16: Land to the north of Clayton Mills and Mackie Avenue

Land to the north of Clayton Mills and Mackie Avenue is allocated as a Strategic Development in MSDP Policy DP 11. Development Proposals on this site will be supported where they accord with MSDP DP 11.

To ensure the site is developed in line with the Vision and Strategic Objectives of the HNP, HPC will support proposals which:

1. Do not extend into the Local Gap (as identified on the Proposals Map);
2. Provide a greenspace buffer on the northern periphery of the site to form a defensible boundary and to prevent coalescence with Burgess Hill;
3. Transfer land within the greenspace buffer to the Parish Council;
4. Protect the amenity of existing residential properties bordering the site;
5. Provide a suitable mix of dwelling type and sizes to meet the needs of current and future households;
6. Protect existing Public Rights of Way within, and adjacent to, the site and their open aspect through suitable landscaping;
7. Provide and enhance safe pedestrian and cycle routes from Hassocks village centre to Burgess Hill via the development site;
8. Do not detract from, or cause detriment to, the special qualities and tranquility of the South Downs National Park (in line with HNP Policy 6);
9. Protect the setting of the nearby heritage asset;
10. Protect existing open space to the south of the strategic allocation;
11. Provide a mix of high quality formal and informal open space;
12. Provide suitable access and parking arrangements; and
13. Maximise opportunities to facilitate and provide the increased use of alternative means of transport to private non-carbon fuelled vehicles.

Land to the West of London Road

- 6.29. The previous Submission HNP allocated a number of green spaces both within and around the built areas of the Parish that met the requirements of the NPPF. This included Land at the Ham³³ (LGS2) as a Local Green Spaces.
- 6.30. Notwithstanding this, an application for residential development for 97 dwellings on land west of London Road³⁴ was submitted to MSDC in November 2013. The application was

³³ Also known as land to the west of London Road

³⁴ DM/13/03818

refused in May 2014; and was the subject of an appeal which was dismissed in March 2015. However, this decision was challenged in the High Court and was subsequently quashed in February 2016. The appeal was therefore the subject of re-determination by the Secretary of State (SoS).

- 6.31. The Government appointed Inspector held a Public Inquiry in August 2016. HPC made representations at the Public Inquiry setting out strong objections to the proposed development. Notwithstanding, the SoS allowed the appeal and planning permission was granted in March 2017.³⁵
- 6.32. Since this granting of permission for 97 residential units, a subsequent application for residential development for 129 dwellings and associated infrastructure was submitted to MSDC in October 2017. The application was approved in July 2018.³⁶
- 6.33. The principle of development on this site has been established through the granting of planning permission.

Aim 4: Housing Mix

- 6.34. The Census data indicates that the average household size in the Parish was 2.28 persons in 2011; an increase of 2.21 persons from the Census of 2001. It is considered that this change, which runs contrary to the general trend of decreasing household size, is considered likely to be attributable to the development of Clayton Mills which is typified by family style dwellings.
- 6.35. The Census data from 2011 also reveals that there is a broad range in the size of households. Some 30% are 1 person; 38% are 2 persons; 14% are 3 persons; 14% are 4 persons; and 5% are 5 persons or more.
- 6.36. This demonstrates that the actual size of households is predominantly 2 or less (68%). Whilst this does not necessarily automatically translate into a demand for 1 and 2 bedroom properties (as some smaller households may wish to have additional bedrooms for use as study/spare room etc), it does indicate that the demand from the resident population is likely to be more toward smaller properties, than larger properties.
- 6.37. The NPPF, advises the size, type and tenure of housing needed for different groups in the community should be assessed and reflected in planning policy.
- 6.38. HPC wish to support new residential development to provide a mix of housing types. Support will therefore be offered to developments which seek to contribute to the demand

³⁵ APP/D3830/W/14/2226987

³⁶ DM/17/4307

for 1 and 2 bedrooms dwellings. This will serve to ensure that the needs of all sizes of households are likely to be met in future developments.

- 6.39. It is also considered that the different needs of varying sectors of the community need to be provided for within new housing developments, including older people and vulnerable groups. An example of this is via the provision of dwellings that meet the Lifetime Homes Standard. This is justified given the Census data from 2011 indicates that 26% of the resident community of the Parish are aged 65 or over.

Aim 4: Housing Mix

Development proposals which provide a mix of dwelling types and sizes to meet the needs of different groups will be supported.

Policy 17: Affordable Housing

- 6.40. The MSDP sets out the requirement for the provision of affordable housing for residential development. MSDP Policy DP31 sets out different thresholds with respect to the provision of affordable housing, dependent upon the size and location of development.
- 6.41. In addition, Policy DP31 requires all affordable housing to be integrated with market housing and meet national technical standards for housing. The HNP supports the requirements of MSPD Policy DP31.
- 6.42. MSDC is required to publish an Allocation Scheme which sets out how it decides who to put forward as a prospective tenant of a housing association property. The Scheme must show how MSDC awards priority to particular descriptions of applicants and the procedure that is followed in allocating housing.
- 6.43. MSDC published, a report entitled “Housing Allocation Scheme”, in April 2018. It sets out who qualifies to go on the housing register; how priority is given to Applicants with differing housing circumstances; and the procedures that are to be followed when applicants are selected to be allocated accommodation by MSDC.
- 6.44. The Report confirms MSDC is concerned that new developments of general needs housing in the towns and villages of Mid Sussex should enable those local people in housing need who wish to do so to remain in their local community in order to contribute to the sustainability of that community. The Report³⁷ sets out “special rules” designed to ensure this happens.

³⁷ Section 39, MSDC Housing Allocation Scheme with effect from April 2018

- 6.45. The provision of affordable housing for local people is an aspiration of the HNP. The HNP therefore supports people with a local connection who wish to secure affordable housing in the Parish.

Policy 17: Affordable Housing

Residential development proposals should provide a mix of affordable housing sizes, types and tenures aligned to meet the needs of the Parish.

When allocating the first letting of a home within a new development of general needs housing, priority will be given to bids from applicants who have a local connection to the parish of Hassocks. In order to establish a local connection, the applicant(s) must meet one of the following criteria:

1. Resides in the Parish of Hassocks as their only, or principal home, and has done so for the previous 2 years; or
2. Has resided in the Parish of Hassocks as their only, or principal home, for a period of at least 3 years in aggregate out of the preceding 5 years; or
3. Is in paid employment in the Parish of Hassocks (working 16 hours or more a week) and has been for the previous 2 years; or
4. Has close relatives who reside in the Parish of Hassocks as their only, or principal home, and have done so for at least the previous 5 years, or the previous 2 years if the Applicant is aged 65 or over.

Larger new developments containing 250 homes or more in total are intended to meet the housing needs of the whole District and are therefore exempt from the local connection criteria above.

Chapter 7

Economy

7. ECONOMY

Strategic Objectives:

- **To encourage economic development and job creation within the built-up area of the village.**
- **To develop the centre of the village to form a distinctive social hub.**

Introduction

- 7.1. The Census data from 2011 indicates that the ‘economically active’ residents of the Parish are more likely to be ‘white-collar’ workers in ‘professional’ jobs, that work from home or commute to London, than the District and National average.
- 7.2. This is reflected in the general absence of large areas of employment floorspace in the Parish, and a lack of demand for such provision in the results of surveys³⁸ undertaken as part of the preparation of the HNP.
- 7.3. Other economic activity floorspace of the Parish is therefore focussed on the retail shops and services located predominantly along Keymer Road.

Policy 18: Village Centre

- 7.4. A District Council Retail Study, dated November 2014, found a healthy commercial centre, of the Parish with a typically well-maintained public realm and limited number of vacant units. It noted that in the 10 years since the previous survey, the overall number of units had increased. There was however, some shift in use with a decline in ‘convenience’ and ‘comparison’ units, and an increase in, amongst others, cafes.
- 7.5. It is considered important to seek to preserve and enhance the vitality and viability of this retail and commercial centre. In particular, support is offered for proposals that would enhance the character and sense of place of the centre. Such works should facilitate the experience and enjoyment of users of these facilities. This could be achieved by a range of measures.

³⁸ NP Business Questionnaire, March 2015

Policy 18: Village Centre

Development proposals which seek to enhance the character and sense of place of the central retail and commercial area of Hassocks will be supported.

This will include, but is not limited to, proposals to enhance parking facilities, traffic flow, pedestrian and cycling facilities, shop frontages, green spaces, public realm and signage.

Policy 19: Tourism

- 7.6. The southern part of the Parish, including Clayton, lies within the South Downs National Park (see Figure 2), whilst the main built-up area of Hassocks and Keymer lies at the foot of the scarp slopes.
- 7.7. Within the Parish boundary are the iconic ‘Jack and Jill’ Clayton windmills, which are visible from the east-west South Downs Way, located a short way to the south.
- 7.8. The position of the main built-up area of the village, including its railway station provides a convenient and accessible gateway to visitors to the South Downs National Park (SDNP).
- 7.9. Aligned to this, the SDNPA commissioned, Visitor Accommodation Review (December 2014) concludes that there is potential for visitor accommodation development across all parts of the SDNP, both in terms of expansion and upgrade of existing accommodation, and the development of new accommodation. The survey concludes that the visitor accommodation sector is performing very strongly at weekends and during the week in the peak summer months, with frequent shortages of all types of accommodation at these times. It also concludes that there is strong demand for high quality accommodation which generally trades at the highest levels of occupancy and price. It considers that there is a clear prospect for future growth in the demand for all types of visitor accommodation in the National Park, and there are some clear gaps in accommodation supply along the South Downs Way.

Figure 15 - Oldlands windmill

- 7.10. It is considered that the Parish is geographically well-placed to contribute to meeting the demand for accommodation in and around the SDNP. However, at present the Parish has only a limited provision of overnight accommodation.
- 7.11. HPC therefore supports the growth of overnight accommodation within the Parish to contribute to meeting the need identified in the National Park commissioned survey. Such provision must have regard to impact on its immediate environs.

Policy 19: Tourism

Development proposals, which promote tourism activities and include overnight accommodation, will be supported provided the siting, scale, and design has regard to, and reflects the local area.

Chapter 8

Transport

8. TRANSPORT

Strategic Objectives:

- To promote non-car modes of travel, including through accessibility to public transport and improvements in pedestrian and cycle safety; encouraging people to walk, cycle and ride in, and around the parish; to reduce the impact of traffic in terms of congestion, pollution, parking and vehicle speeds; and to encourage the use and availability of electric vehicles.
- To ensure the whole parish is safe, accessible and attractive to all, acting as a gateway to the South Downs National Park, encouraging tourism, and supporting healthy lifestyles and wellbeing.

Introduction

- 8.1. Hassocks is readily accessible by road and rail and benefits from public bus services. However, the intersection of the north-south and east-west routes at Stonepound Crossroads suffers from congestion at peak times. Air pollution is a key concern in this area. The village centre and some residential streets in the vicinity of the train station also experience parking congestion.
- 8.2. Delivering improvement to the existing infrastructure network and associated public transport services, generally lies outside the scope of a Neighbourhood Plan, and is reliant on other organisations. However, transport measures to improve existing deficiencies is supported by HPC and are therefore included within the HNP as Aims.

Aim 5: Non-Car Route Ways

- 8.3. The Parish is relatively well served by footpaths within the main built-up area and the adjacent countryside. There are 'gaps' in provision where a short link between existing paths could improve the value of the overall network. HPC therefore, wish to support measures, either individually or collectively to form a linked PRow or non car route network to create a circular accessibility route around the built-up area of Hassocks.
- 8.4. The footpaths and cycle ways are generally well marked. Nevertheless, the surface of many paths is poor and many become impassable in the winter months. HPC wish to support the repair and upgrade of PRowS to enhance their physical usability all year round by those with mobility impairments.

- 8.5. HPC wish to support measures to increase and improve off road routes and inter-connectivity. In particular, HPC wish to support the creation of all-weather publicly accessible non-car routes to link Hassocks and Clayton villages; Hurstpierpoint and Burgess Hill in particular on land to the east of the railway line.
- 8.6. Public consultation events have highlighted local concern with the PRoW which includes the unprotected railway crossing between the Clayton Mills and Shepherd's Walk estate as a potential safety issue. HPC therefore wish to support enhancements in the safety of the PRoW crossing of the railway line on land between Clayton Mills and Shepherds Walk.
- 8.7. Given the development pressures facing Hassocks, HPC wish to support the provision and/or enhancement of non-car accessibility routes, including for mobility impaired between new development and Hassocks centre.

Aim 5: Non-Car Route Ways

Support will be offered for measures to improve the accessibility and usability of Public Rights of Way (PRoW). This includes, but is not limited to:

1. Measures, either individually or collectively, to form a linked PRoW or non-car route network to create a circular accessibility route around the built-up area of Hassocks;
2. The repair and upgrade of PRoWs to enhance their usability all year round and by those with mobility impairments;
3. Enhancement in the safety of the PRoW crossing of the railway line on land between Clayton Mills and Shepherds Walk;
4. Provision and/or enhancement of non-car accessibility routes, including for mobility impaired between new development and Hassocks centre;
5. The creation of an all-weather publicly accessible non-car route linking Hassocks and Clayton villages;
6. The creation of an all-weather publicly accessible non-car route linking Hurstpierpoint and Hassocks (in consultation with Hurstpierpoint and Sayers Common Parish Council); and
7. The creation of an all-weather publicly accessible non-car route linking Hassocks to Burgess Hill, in particular on land to the east of the railway line.

Aim 6: Public Transport

- 8.8. The London to Brighton line which serves Hassocks is operating at capacity and this has an impact on the reliability of services. It is acknowledged some improvement in reliability should be possible as the existing signaling system is replaced, which is due to take place in stages over the next ten years.
- 8.9. Given the wider capacity constraints, it is acknowledged there are limited measures that could be undertaken to improve train services from Hassocks. However, HPC supports measures which could increase train services serving Hassocks.
- 8.10. In contrast to rail services, the Parish is not as well served by buses. At present the majority of buses serving Hassocks run parallel to the railway on the A273 and do not directly serve the railway station or the village centre.
- 8.11. The village is served by the following buses: No.33 (a service between Hurstpierpoint, Burgess Hill and Haywards Heath, operating Monday-Saturday); 33A (a service between Warden Park School, Haywards Heath, Burgess Hill and Hurstpierpoint, operating Monday-Saturday. 590 (a service between Sayers Common, Hurstpierpoint, Keymer and Albourne, operating Monday-Friday); and 331 (a service between Sayers Common, Hurstpierpoint, Hassocks and Downlands, operating on school days only).
- 8.12. The 'Village Rider' No.167 (Burgess Hill, Hassocks, Ditchling and Offham, operating Monday-Friday) and No.168 (Burgess Hill, Wivelsfield, East Chilmington, Ditchling and Burgess Hill operating Monday to Friday) also serves the village.
- 8.13. In addition, the 270, 271, 272 and 273 offer services to Brighton operating Monday-Sunday. There is a community bus service which is operated by volunteers.
- 8.14. From Hassocks train station there are regular services running daily to London. The average direct journey time (from Hassocks to London Victoria) is 1hr 04 mins. The fastest journey is 47 minutes. On an average weekday, there are 40 trains per day traveling from London Victoria to Hassocks.³⁹ There are also regular services running daily from Hassocks train station to Brighton taking on average 11 minutes.
- 8.15. HPC therefore supports improvements to both bus and rail services, as well as improvements to public transport infrastructure.

³⁹ www.thetrainline.com/train-times/london-victoria-to-hassocks

Aim 6: Public Transport

Support will be offered for measures to improve public transport accessibility to, within, and around the Parish. This includes, but is not limited to:

1. Enhancement of bus and rail services, including the number and times of services, frequency, capacity and connectivity to the wider public transport network; and
2. Enhancement of bus and rail infrastructure, including bus stops and rail station car parking.

Aim 7: Traffic and Accessibility

- 8.16. Stonepound Crossroads is an AQMA, due to the high levels of nitrogen dioxide in the area, caused by the volume of traffic and the start-stop routine of driving conditions at peak times. During peak hours there are significant queues on the approaches to Stonepound Crossroads. This is reflected in the findings of the AQMA; and the Action Plan for the area sets out a range of proposals to seek to reduce the amount of traffic using the junction, in particular by HGV's. HPC wish to support the routing of HGVs away from the A273 in proximity to the Stonepound Crossroads.
- 8.17. Public consultation, as part of the preparation of the HNP has highlighted concern regarding congestion and safety within the centre of the village, particularly on Keymer Road between Dale Avenue and Woodsland Road.
- 8.18. HPC therefore wish to support proposals that will result in a reduction in traffic and congestion, association pollution and highway safety problems at these junctions.
- 8.19. Traffic accident data has highlighted road safety as an issue on the A273, with particular focus at Stonepound Crossroads, and on Keymer Road between Dale Avenue and the Parklands Road junction.
- 8.20. During a public consultation exercise as part of the preparation of the HNP, concern was expressed by local residents at the speed of vehicular traffic in the Parish, particularly on Grand Avenue and Keymer Road. There were requests for improved enforcement of speed limits. Furthermore, there was strong support from local residents for the introduction of 20mph speed limits around the schools and in the centre of the main built-up area.
- 8.21. HPC therefore wish to support the introduction of 20mph zones within the Parish's existing and proposed residential areas.

- 8.22. Public consultation exercises as part of the preparation of the HNP identified concerns with road safety at the junction of Lodge Lane and New Road, where traffic from Lodge Lane seeks to enter the flow of traffic on New Road. In light of this, HPC wish to support the introduction of roundabouts at the junctions of Keymer Road/Grand Avenue, and Lodge Lane/New Road.
- 8.23. HPC wish to support efficient, safe and accessible means of transport with overall low impact on the environment. In line with paragraph 105 of the NPPF, HPC wish to support the adequate provision of, or contribution towards infrastructure, to facilitate electric and other ultra low emission vehicles within the Parish.

Aim 7: Traffic and Accessibility

Support will be offered for proposals to minimise the impact of traffic and enhance traffic safety within the Parish. This includes, but is not limited to:

1. Reduction in traffic congestion, association pollution and highway safety problems at Stonepound Crossroads, Dale Avenue and Keymer Road;
2. Introduction of 20mph zones within the Parish's existing and proposed residential areas;
3. Introduction of roundabouts at the junctions of Keymer Road/ Grand Avenue, and Lodge Lane/New Road;
4. Routing HGVs away from the A273 in proximity to the Stonepound Crossroads; and
5. Promotion of, or contribution towards, infrastructure to enable use of non-carbon fuelled vehicles within the Parish, including from new development.

Chapter 9

Implementation & Delivery

9. IMPLEMENTATION AND DELIVERY

- 9.1. The HNP will provide a long-term planning framework for the Parish. The HNP will subsequently be subject to an independent Examination and if successful will be subject to Referendum.
- 9.2. The HNP once “made” by MSDC will become part of the Development Plan for the District. It will be used by MSDC officers to guide development, in those areas which fall outside of the SDNP up to 2031.
- 9.3. The HNP will also become a Development Plan of the SDNPA. It will be used by SDNPA Officers to guide development, in those areas which fall inside of the SDNP up to 2031.
- 9.4. Once part of the Development Plan Document, it is envisaged MSDC will monitor the effectiveness of the HNP to ensure the effective delivery of its Strategic Objectives.
- 9.5. MSDC have prepared an Infrastructure Delivery Plan (IDP) to support the MSDP. This sets out and identifies the infrastructure required to support the growth identified within the MSDP. MSDC have confirmed they are intending to progress work on a Community Infrastructure Levy Charging Schedule, which will set out the charging rates for new development in Mid Sussex. MSDC have advised there is no timetable for this work program agreed at this time.
- 9.6. In the meantime, infrastructure facilities and services directly required by development will be funded through financial contributions and will be negotiated via S106 agreements.
