RE: Pavilion Works

Dear Helen,

I am delighted to be able to confirm the following details and prices for the following work around the Pavilion in Adastra Park:

1. Cut back all of the Hedging by approximately 80cm away from the Pavilion walls on all sides. To remove all of the Ivy growing up the walls. Total Cost £360.00 plus vat.
2. To install Aco drains across the front doors of the Pavilion and plumb these into the existing line of Aco. The concrete immediately outside of the doors will be dug out and the paving cut back a little to allow for the installation of the Aco which will be concreted into place. Total Cost £445.00 plus vat.
3. To install an overflow pipe from the existing Aco, across to the ditch at the rear of the Pavilion. A trench through the existing Tarmac will be dug, a 110mm overflow pipe installed between the Aco and the trench encased in 10mm gravel and then the surface concreted back level with the Tarmac on each side. Total Cost £902.00 plus vat.
4. To install a French Drain along the grass edge of the path by the Pavilion, approximately 24 meters long. A trench will be dug and a 80mm perforated land drain pipe installed, encased in 10mm gravel. Some soil and grass seed will be laid back on top of the French drain. This will be plumbed into the end of the existing Aco crossing the path. Total Cost £1145.00 plus vat

All materials to be supplied by us.

All waste will be removed and the grounds left clean and tidy upon completion.

I shall be happy to meet you to discuss the work further if you wish.

I look forward to hearing from you.

Yours Sincerely

Martin Dean, Greenscene Landscapes
