Item 8: Winter Garden Planting

Ground Preparation

Ideally spray off grass before cultivating. - Not recommended in this position due to public area

Cultivate to depth of around 300 mm and incorporate compost into the soil.

Consider other measures to improve drainage eg sand/gravel bands.

- To dig out water garden 150mm lower than present level, creating a soil & turf bridge over the area adjacent to the corner of the paved path. Drainage tubes will be installed at ditch level to allow water to flow from one side to the other, beneath the soil bridge. Mix 10mm gravel with bed of ditch for entire length. Rotivate 80cm width of grass on either side of ditch, adding planting compost ready for planting. £1260 plus vat = £1512.00 inclusive

Planting

Layout plants in pots to agree planting layout. - Plant prices see next pages, prices include Vat & delivery.

- Plants can be laid out ready for planting for £70 plus vat

Water thoroughly after planting.

Mulch with an ornamental bark mulch.
